

The economical payment station for the Retail trade

- Automated payment at the point of sale
- Time savings for employees
- Employees no longer handle cash, check authenticity or give change
- Self-service or cashier operated checkout
- Reduce discrepancies and shrinkage
- Reduced staff cash handling and improved hygiene

The economical payment station for the Retail trade

The Cash Desk ECO was designed to improve efficiency at the Point Of Sale. The Cash-Desk ECO can be located both in front and in the back of the POS counter.

Payment can be made by the customer or the cashier. The amount due is entered via a hand-held bar code scanner.

The amount to be paid is shown on the display. The payment is made with banknotes and coins.

Coins are quickly and easily deposited into a coin bulk chute.

In case of overpayment, change is paid out.

Machine configuration

- **Banknote acceptor with recycling and dispense function**
Two banknote denominations each with a max. recycling capacity of 100 banknotes and a banknote cashbox for approx. 1,000 banknotes.

Fast bulk reloading of the recycler boxes.
