Customer-specified solutions

Design is an example

- **Minimum space requirement**
Small, compact solution with base. Coin acceptance and pay-out of up to two medals accommodated in a confined space.
- **High security**
during the examination, processing and pay-out of coins and medals.
- **Solid workmanship**
Steel sheet housing with 3-point locking device and high-quality security lock. Resistant 2-coat varnish crystal colour of the housing.
- **Optimal presentation of the medals**
These are displayed graphically on the 7" LCD Touch display and also (optionally) shown on the individually printable front screen with your own attractive motif.
- **Purchase of medals**
The value of the medals is freely adjustable. Discount possible.
- **Alternatively with bank note acceptance or coin validator**
- **Electronic coin validator**
for the acceptance of up to 6 coin values.
- **One or two output units for medals**
the payout hoppers have a capacity of 1,000 up to 2,400 medals (depending on the diameter and the thickness the medal). Output of two types of medals possible (diameter 16 to 31 mm / thickness 1.25 to 3.5 mm).
- **Transparent top light display**
Engraving can be adjusted to the respective medal / your requirements.
- **Rollable base**
To allow easy outdoor installation daily.

Hard- and Software

- **7-inch TFT Touch colour display**
for a simple, interactive operation.
- **Internal PC control**
based on Linux. An uninterruptible power supply ensures a backup during a power failure.
- **Web browser technology**
Thus software settings from anywhere in the world are possible.
- **Various setting options via the web interface:**
Calling up statistics, viewing log data, resetting faults, cashing, sending emails and much more.
- **Network technology**
Wireless connection is possible via WiFi and UMTS (optional).
